

ENVIRONMENTAL POLICY

Effective from: July 1, 2020

EDITION: 1

Univergy Solar is a Spanish-Japanese business group with the following activities as its corporate purpose:

- Processing of licenses and permits to develop and operate renewable energy systems.
- Project design and engineering. Engineering, planning, design and planimetry, mechanical and electrical design, and construction management.
- Implementation of projects for the construction of solar energy systems.
- Connection and start-up of solar energy facilities.

Our activities involve a number of environmental implications, in response to which we invest in a management system in accordance with the UNE-EN-ISO 14001:2015 standard, taking on the following commitments:

- Integrate environmental management into the corporate strategy of the company, using environmental criteria in planning and decision-making processes.
- Disseminate environmental policy among company staff and external stakeholders, reporting with total transparency on our environmental philosophy and performance.
- Ensure compliance with existing environmental legislation, as well as with voluntary commitments acquired and other applicable requirements.
- Establish processes for continuous improvement of the system, based on the periodic establishment of ambitious, measurable and achievable objectives.
- Train and raise awareness among the people of the organization and those who work on its behalf about the environmental aspects that their activity can generate, involving them in the control of the above and the environmental performance of all activities of the company.
- Use environmental criteria in the process of selection and evaluation of suppliers and subcontractors.
- Protect the environment through the following specific commitments:
 - Prevent pollution through rational use of resources and flawless waste management.
 - Conserve biodiversity, using design criteria and environmentally friendly ways of working.
 - Actively fight climate change.

All members of Univergy Solar assume these principles, and it is our responsibility to implement them. Univergy Solar promotes environmental improvement, and allocates the resources needed to ensure the successful implementation of this environmental policy.
